

# PIT FOAM & EDGING

With the money that we raised from the sponsored roll event and the Cash for Kids initiative we were able to place a big order for 84 packets of foam. However due to a global foam shortage the delivery took a little longer to arrive than planned, but we are pleased to say that we have now had that delivery. You will have seen that the pits are now looking super full. We also still have plenty of packets of foam to keep topping it up over the next few months once the current foam has settled in the pits.

Mark has also been working hard in replacing the current blue edge with a new carpeted edge. This involves taking away the current surround, then drilling new boards onto the wall of the pit and then securing new carpet that folds over the edge of the pit. It is still a working progress, but we can't wait until it is finished.
